

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product Name: HSBC GLOBAL INVESTMENT FUNDS - EUROPE VALUE

Legal Entity Identifier: 213800NDHT1X7UMKBO83

Environmental and/or social characteristics

Did this financial product have a sustainable investment objective?

☒ ☐ **Yes**

☐ It made **sustainable investments with an environmental objective:** _%

☐ in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☐ in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ It made **sustainable investments with a social objective:** _%

☒ ☐ **No**

☒ It **promoted Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of 42.79% of sustainable investments

☐ with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

☒ with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

☐ with a social objective

☐ It promoted E/S characteristics, but **did not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The environmental and/or social characteristics ("E/S characteristics") promoted by this sub-fund were:

1. A minimum proportion of the sub-fund's investments met minimum ESG standards, i.e. the companies that the sub-fund invested in were required to meet minimum ESG and E, and S and G score levels.
2. The identification and analysis of a company's environmental and social factors, including corporate governance practices which formed an integral part of the investment decision making process.
3. Consideration of responsible business practices in accordance with United Nations Global Compact ("UNGC") and OECD Guidelines for Multinational Enterprises ("OECD") principles. Where instances of potential violations of UNGC principles were identified, issuers were subject to HSBC's proprietary ESG due diligence checks to determine their suitability for inclusion in the sub-fund's portfolio and, if deemed unsuitable, excluded.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

4. Excluding activities covered by HSBC Asset Management's Responsible Investment Policies the ("Excluded Activities").

● *How did the sustainability indicators perform?*

| Sustainability Indicator | sub-fund | Reference Benchmark |
|--|----------|---------------------|
| Minimum ESG standards | | |
| Percentage of the sub-fund aligned with the E/S characteristics | 96.84 | NA |
| Identification and analysis of a company's environmental and social factors | | |
| ESG score (third-party score) | 7.82 | 7.81 |
| Responsible business practice in line with UNGC and OECD principles | | |
| Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 0.00% | 0.00% |
| Excluded Activities | | |
| The sub-fund did not invest in any of the Excluded Activities detailed in the Prospectus/pre-contractual disclosure | | |

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2025.

Reference Benchmark - MSCI Europe

● *...and compared to previous periods?*

| Sustainability Indicator | Period Ending | sub-fund | Reference Benchmark |
|--|---------------|----------|---------------------|
| Minimum ESG standards | | | |
| Percentage of the sub-fund aligned with the E/S characteristics | 31 March 2025 | 96.84 | NA |
| | 31 March 2024 | 97.77 | NA |
| | 31 March 2023 | 99.21 | NA |
| Identification and analysis of a company's environmental and social factors | | | |
| ESG score (third-party score) | 31 March 2025 | 7.82 | 7.81 |
| | 31 March 2024 | 7.97 | 7.82 |
| | 31 March 2023 | 0.00 | 0.00 |
| Responsible business practice in line with UNGC and OECD principles | | | |
| Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 31 March 2025 | 0.00% | 0.00% |
| | 31 March 2024 | 0.00% | 0.00% |
| | 31 March 2023 | 0.00% | 0.00% |
| Excluded Activities | | | |
| Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) | 31 March 2025 | 0.00% | 0.46% |
| | 31 March 2024 | 0.00% | 0.40% |
| | 31 March 2023 | 0.00% | 0.00% |

Please note that the sustainability indicators were updated in the latest pre-contractual disclosure document, which formed part of the Prospectus dated 31 March 2025, and there may be some variation in the table above in comparison to previous years.

● ***What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?***

The sustainable investments contributed to the environmental and/or social objectives of the sub-fund. Investments were considered sustainable if they made a positive contribution in accordance with HSBC's Sustainable Investment Policy. The objective of the sustainable investments of the sub-fund was the promotion of the highest levels of environmental and social practices.

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

The sustainable investments of the sub-fund were assessed against the principle of Do No Significant Harm ("DNSH") to ensure that the investments did not significantly harm any environmental or social objectives. The DNSH principle applied only to the underlying sustainable investments of the sub-fund. This principle was incorporated into the investment decision-making process, which included the assessment of principal adverse impacts ("PAIs").

How were the indicators for adverse impacts on sustainability factors taken into account?

The mandatory PAIs as defined in Table 1 of Annex 1 of the regulatory technical standards for Regulation 2019/2088 were used to assess whether the sustainable investments of the sub-fund were significantly harming the environmental or social objective.

To support the DNSH assessment, quantitative criteria was established across the PAIs.

In instances where data was either non-existent or not sufficient, either a qualitative review and/or a relevant proxy may have been used as an alternative. Where a company was determined to cause or contribute to significant harm, it may still have been held within the sub-fund but did not count toward the portion of 'sustainable investments' within the sub-fund.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?

The Investment Adviser used third-party research providers to monitor companies for controversies which indicated potential breaches of the UNGC principles. Companies that were flagged for potential violation of UNGC principles were systematically excluded, unless they went through an ESG due diligence assessment, undertaken by HSBC, and were determined not to be in breach of these principles.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The EU Taxonomy sets out a “do no significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The sub-fund specifically considered the following PAIs, as part of the investment process:

| Principal Adverse Impact | Period Ending | sub-fund | Reference Benchmark |
|--|---------------|----------|---------------------|
| 3. GHG Intensity of investee companies - Tons of CO2 equivalents per million of Euros of revenue | 31 March 2025 | 121.57 | 93.02 |
| | 31 March 2024 | 135.27 | 98.22 |
| | 31 March 2023 | 0.00 | 0.00 |
| 10. Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises | 31 March 2025 | 0.00% | 0.00% |
| | 31 March 2024 | 0.00% | 0.00% |
| | 31 March 2023 | 0.00% | 0.00% |
| 13. Board gender diversity | 31 March 2025 | 42.01% | 41.78% |
| | 31 March 2024 | 41.03% | 41.00% |
| | 31 March 2023 | 0.00% | 0.00% |
| 14. Exposure to controversial weapons (anti-personnel mines, cluster munitions, chemical weapons and biological weapons) | 31 March 2025 | 0.00% | 0.46% |
| | 31 March 2024 | 0.00% | 0.40% |
| | 31 March 2023 | 0.00% | 0.00% |

The data in this SFDR Periodic Report is based on the four-quarter average holdings of the financial year ending on 31 March 2025.

Reference Benchmark - MSCI Europe

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: Based on the four-quarter average holdings of the reference period as at 31/03/2025

| Largest Investments | Sector | % Assets | Country |
|----------------------------|------------------------|-----------------|--|
| AstraZeneca PLC | Health Care | 4.07% | United Kingdom of Great Britain and Northern Ireland |
| KBC Group N.V. | Financials | 3.86% | Belgium |
| Commerzbank AG | Financials | 3.36% | Germany |
| Allianz SE | Financials | 3.14% | Germany |
| Royal KPN NV | Communication Services | 3.14% | Netherlands |
| ING Groep NV | Financials | 3.11% | Netherlands |
| Anheuser-Busch InBev SA/NV | Consumer Staples | 3.02% | Belgium |
| BP PLC | Energy | 3.00% | United States of America |
| Heineken NV | Consumer Staples | 2.75% | Netherlands |
| Novartis AG | Health Care | 2.75% | United States of America |
| Siemens Aktiengesellschaft | Industrials | 2.73% | Germany |
| AXA SA | Financials | 2.57% | France |
| Novo Nordisk A/S Class B | Health Care | 2.57% | Denmark |
| Anglo American plc | Materials | 2.44% | South Africa |
| Barclays PLC | Financials | 2.32% | United Kingdom of Great Britain and Northern Ireland |

Cash and derivatives were excluded

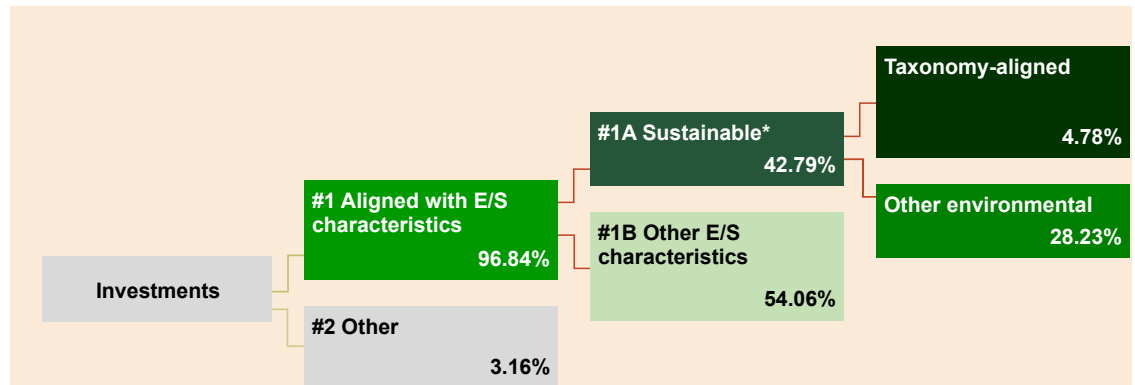

What was the proportion of sustainability-related investments?

42.79% of the portfolio was invested in sustainable investments.

Asset allocation
describes the share
of investments in
specific assets.

What was the asset allocation?

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

*A company or issuer considered as a sustainable investment may contribute to both a social and environmental objective, which can be aligned or non-aligned with the EU Taxonomy. The figures in the above diagram take this into account, but one Company or Issuer may only be recorded once under the sustainable investments figure (#1A Sustainable).

Due to the difference in the calculation methods, the percentages of Taxonomy-aligned and Other environmental, do not equal #1A Sustainable.

In which economic sectors were the investments made?

| Sector / Sub-Sector | % Assets |
|---------------------------------|--------------|
| Financials | 26.65% |
| Industrials | 15.07% |
| Materials | 10.77% |
| Health Care | 10.49% |
| Consumer Staples | 8.58% |
| Energy | 6.81% |
| <i>Integrated Oil & Gas</i> | <i>6.81%</i> |
| Communication Services | 6.37% |
| Utilities | 5.85% |
| <i>Electric Utilities</i> | <i>3.29%</i> |
| <i>Multi-Utilities</i> | <i>2.57%</i> |
| Consumer Discretionary | 3.99% |
| Information Technology | 3.28% |
| Real Estate | 1.71% |
| Cash & Derivatives | 1.28% |
| Total | 100.00% |

To comply with the EU Taxonomy, the criteria for **fossil gas** include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The proportion of sustainable investments aligned with the EU Taxonomy was 4.78%. The sub-fund did not make any commitment to make any EU Taxonomy aligned investments.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

In nuclear energy

No

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- **capital expenditure** (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- **operational expenditure** (OpEx) reflects the green operational activities of investee companies.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.*

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures.

What was the share of investments made in transitional and enabling activities?

For the reference period the sub-fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 1.85%.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

| Indicator | 2024-25 | 2023-24 | 2022-23 |
|---|---------|---------|---------|
| Revenue - Taxonomy-aligned: Fossil gas | 0.01% | 0.00% | 0.00% |
| Revenue - Taxonomy-aligned: Nuclear | 0.01% | 0.00% | 0.00% |
| Revenue - Taxonomy-aligned (no gas and nuclear) | 4.76% | 0.00% | 0.00% |
| Revenue - Non Taxonomy-aligned | 95.22% | 100.00% | 100.00% |
| CAPEX - Taxonomy-aligned: Fossil gas | 0.03% | 0.00% | 0.00% |
| CAPEX - Taxonomy-aligned: Nuclear | 0.01% | 0.00% | 0.00% |
| CAPEX - Taxonomy-aligned (no gas and nuclear) | 8.88% | 0.00% | 0.00% |
| CAPEX - Non Taxonomy-aligned | 91.08% | 100.00% | 100.00% |
| OPEX - Taxonomy-aligned: Fossil gas | 0.01% | 0.00% | 0.00% |
| OPEX - Taxonomy-aligned: Nuclear | 0.01% | 0.00% | 0.00% |
| OPEX - Taxonomy-aligned (no gas and nuclear) | 5.55% | 0.00% | 0.00% |
| OPEX - Non Taxonomy-aligned | 94.43% | 100.00% | 100.00% |

 are sustainable investments with an environmental objective that **do not take into account the criteria for environmentally sustainable economic activities** under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The sustainable investments with an environmental objective not aligned with the EU Taxonomy were 28.23%. Due to lack of coverage and data, the sub-fund did not commit to making any EU Taxonomy aligned investments.

What was the share of socially sustainable investments?

The sub-fund did not invest in socially sustainable investments.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

#2 Other included money market funds for liquidity management purposes, liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivative instruments which may have been used for efficient portfolio management. This may also have included investments that were not aligned for other reasons such as corporate actions and non-availability of data.

Liquid assets (ancillary liquid assets, bank deposits, money market instruments and money market funds) and financial derivatives instruments are not considered to be aligned with E/S characteristics within the sub-fund and do not have any minimum environmental or social safeguards applied. However, money market funds which meet the requirements of Article 8 SFDR are deemed to have minimum environmental or social safeguards.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Over the course of the reporting period, the Investment Adviser excluded activities including, but not limited to banned weapons, controversial weapons, companies with more than 10% revenue generated from thermal coal extraction and coal fired power generation and tobacco production and invested in companies with responsible business practices in accordance with UNGC principles.

ESG analysis was embedded into the fundamental analysis of the stocks the investment teams held and therefore contributed to all trading decisions. Trades reflected a balanced integration of financial and non-financial criteria. Examples of the most significant portfolio changes over the period were:

- We sold our holding in Vonovia SE and we reduced our holding in BP Plc, which reduced the carbon intensity of the sub-fund.
- We initiated a position in Nestle SA, and reinforced our holding in Thales SA, which reduced the carbon intensity of the sub-fund.
- We redeemed our holding in Thyssen Nucera AG & Co, and reduced our holding in BP Plc, which improved the ESG score of the sub-fund.
- We purchased holdings in Banco Santander SA and Kion Group AG, and reinforced our holdings in Anheuser-Busch Inbev SA/NV, which also improved the ESG score of the sub-fund.

In addition, on an ongoing basis, the investment teams apply our stewardship policy and dialog with the companies, and also apply HSBC's voting policy.

How did this financial product perform compared to the reference benchmark?

Not applicable.

● *How does the reference benchmark differ from a broad market index?*

Not applicable.

● *How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?*

Not applicable.

● *How did this financial product perform compared with the reference benchmark?*

Not applicable.

● *How did this financial product perform compared with the broad market index?*

Not applicable.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
