HSBC Asset Management

HSBC Global Investment Funds

EURO CREDIT BOND

Marketing communication | Monthly report 30 September 2026 | Share class AD

Investment objective

The Fund aims to provide long-term capital growth and income by investing in a portfolio of bonds (denominated in Euros), while promoting environmental, social and governance (ESG) characteristics within the meaning of Article 8 of SFDR. The Fund aims to have a higher ESG score than its reference benchmark.

Investment strategy

The Fund is actively managed and is not constrained by a benchmark. The Fund will mostly invest in Euro denominated investment grade corporate issues whilst reserving the possibility of investing in bonds and similar securities issued or guaranteed by governments, government agencies and supranational bodies. The Fund includes the identification and analysis of an issuer's environmental and social factors and corporate governance practices as an integral part of the investment decision making process. Issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies, which may change from time to time. The Fund may invest up to 10% in contingent convertible securities, up to 10% in other funds, and may invest in bank deposits and money market instruments for treasury purposes. See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- Please remember that the value of investments, and any income received from them, can fall as well as rise, is not guaranteed and you may not get back the amount you invested.
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.

MSCI ESG Score	ESG score	E	S	G
Fund	8.1	7.5	5.6	6.5
Reference benchmark	7.6	7.7	5.1	6.2

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI's E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies' scores are normalized by their industries. After any overrides are factored in, each company's Final Industry-Adjusted Score corresponds to a rating.

For more information, see MSCI ESG Ratings Methodology @ https://www.msci.com/esg-and-climate-methodologies

Risk Disclosure

- You should be aware of the potential risk of investing in a currency which is not your base currency and the effect any change in exchange rates may have, be it up or down, when converting your returns back to your base currency. The underlying investments may be made in local currencies which are subject to exchange rate fluctuations if converting returns back to the base currency.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.

Benchmark disclosure

The Investment Advisor will use its discretion to invest in securities not included in the reference benchmark based on active investment management strategies and specific investment opportunities. It is foreseen that a significant percentage of the Fund's investments will be components of the reference benchmark. However, their weightings may deviate materially from those of the reference benchmark. The deviation of the Fund's performance and underlying investments' weightings relative to the benchmark are monitored, but not constrained, to a defined range.
