Risk Disclosure

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- You should be aware of the potential risk of investing in a currency which is not your base currency and the effect any change in exchange rates may have, be it up or down, when converting your returns back to your base currency. The underlying investments may be made in local currencies which are subject to exchange rate fluctuations if converting returns back to the base currency.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
