

HSBC GLOBAL INVESTMENT FUNDS - GLOBAL LOWER CARBON BOND

The Investment Adviser will review all SFDR mandatory Principal Adverse Impacts to assess the relevance to the sub-fund. HSBC's Responsible Investment Policy sets out the approach taken to identify and respond to principal adverse sustainability impacts and how HSBC considers ESG sustainability risks as these can adversely impact the securities the sub-funds invest in. HSBC uses third party screening providers to identify companies and governments with a poor track record in managing ESG risks and, where potential material risks are identified, HSBC also carry out further due diligence. Sustainability impacts, including the relevant Principal Adverse Impacts, identified by screening are a key consideration in the investment decision making process and, in turn, this also supports the advice given to clients.

The approach taken, as set out above, means that among other things the following points are scrutinised:

- companies' commitment to lower carbon transition, adoption of sound human rights principles and employees' fair treatment, implementation of rigorous supply chain management practices aiming, among other things, at alleviating child and forced labour. HSBC also pay a great attention to the robustness of corporate governance and political structures which include the level of board independence, respect of shareholders' rights, existence and implementation of rigorous anti-corruption and bribery policies as well as audit trails; and
- governments' commitment to availability and management of resources (including population trends, human capital, education and health), emerging technologies, government regulations and policies (including climate change, anti-corruption and bribery), political stability and governance.

The sub-fund will promote the following environmental and social characteristics:

1. Active consideration of low carbon intensity investments compared to the Reference Benchmark.
2. Responsible business practices in accordance with UN Global Compact and OECD Principles for businesses.
3. Minimum environmental standards through exclusion of business activities that are deemed harmful to the environment.
4. Identification and analysis of a company's environmental characteristics including, but not limited to, physical risks of climate change and human capital management.
5. Active consideration of environmental issues through engagement and proxy voting.
6. Analysis of the share of investment involved in controversial weapons.

Investment Strategy and Proportion of Investments:

The sub-fund aims to provide long term total return by investing in a portfolio of corporate bonds, while promoting ESG characteristics within the meaning of Article 8 of SFDR. The sub-fund aims to do this with a lower carbon intensity calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Bloomberg Global Aggregate Corporate Diversified Hedged USD (the "Reference Benchmark").

The sub-fund invests (normally a minimum of 70% of its net assets) in Investment Grade and Non-Investment Grade rated fixed income and other similar securities issued by issuers meeting certain lower carbon criteria ("Lower Carbon Criteria"). Lower Carbon Criteria are explained below.

The sub-fund will invest in both developed markets and Emerging Markets. Investments will be denominated in developed market and Emerging Market currencies.

After identifying the eligible investment universe, the Investment Adviser aims to construct a portfolio with lower carbon intensity, calculated as a weighted average of the carbon intensities of the sub-fund's investments, than the weighted average of the constituents of the Reference Benchmark. When assessing issuers' carbon intensity, the Investment Adviser may rely on expertise, research and information provided by well-established financial data providers.

The sub-fund is actively managed and does not track a benchmark. The Reference Benchmark is used for sub-fund market comparison purposes.

The sub-fund promotes Environmental/Social (E/S) characteristics and while it does not have as its objective a sustainable investment, it will have a minimum proportion of 10% of sustainable investments.

Methodologies:

HSBC uses its own proprietary systematic investment process to measure how the environmental characteristics promoted by the sub-fund are met. HSBC will use data provided by a number or third parties. All data used will be verified by HSBC Asset Management's extensive research department.

HSBC's Responsible Investment Policy, our Engagement Policy and Stewardship Plan is available on our website www.assetmanagement.hsbc/responsible-investing/policies.
